Summary

Highly motivated and adaptable full-stack software developer with a diverse background in emergency medical services and the service industry. Proficient in HTML, CSS, and JavaScript, with a strong foundation in Java, Spring, and Angular. Committed to continuous learning and growth, I am seeking opportunities to collaborate with teams and contribute to meaningful projects in a dynamic software development environment.

Projects

RevBoys Shop | https://github.com/tlaze/rev-shop-frontend/tree/main
Technology: Java | SpringBoot | Angular | AWS | MySQL | Stripe API | JavaMailSender
Description: Five-member team tasked with developing an e-commerce website. Implemented user registration, login, and password management functionalities. Integrated Stripe API for seamless shopping cart management and streamlined checkout process.

MyWeatherDashboard | https://github.com/tlaze/weather-channel-program
Technology: Java | Spring | Angular | AWS| OpenWeather API | MySQL | LocalHost
Description: Four-member team, providing forecasts based on user-inputted city, state, or zip code. Implemented hourly, daily, and weekly weather predictions. Enabled user registration, login, and features like favoriting cities and accessing search history.

TechBlog | https://github.com/tlaze/tech-blog
Technology: JavaScript | Node | ExpressJS | BootStrap | React | MySQL | bCrypt
Description: A social media application that enables users to view, create, update, and delete posts and comments. Incorporated secure user authentication and login functionality to grant full access to the site's features.

Work Experience

Full Stack Software Developer | Revature   Dec 2022 - Current
- Collaborated in Agile development environments, participating in daily stand-ups, sprint planning, and retrospective meetings to ensure effective project management and timely delivery of features.
- Developed user-friendly and responsive front-end components using Angular, ensuring seamless user experiences across different devices.
- Implemented and maintained backend functionalities with layered architecture, including RESTful APIs, database models, and business logic.

Education

Full Stack Web Development Bootcamp Certificate | Georgia Tech
- 12-week intensive program focused on gaining technical programming skills for full stack web development.

AAS Fire Protection Technology | Monroe Community College
- Relevant Coursework: Intro to Computer Science with Java, Programming with Python
